Account Number

Please use this number when you request information regarding your account.

Water and Sewer Charges

This area details your fixed monthly charges for water and sewer service, and your water use in each of the five billing tiers. To pay the lowest rates, keep your water use within the Low Volume Discount and Conservation Base Rate tiers. If you see charges in the Inefficient, Excessive, or Wasteful tiers, you are receiving penalties for high water use. Please call IRWD at (949) 453-5324 so we can offer conservation assistance.

Water Allocation

This area shows your water allocation in billing units called CCFs. One CCF equals 748 gallons of water. Your allocation is your target for water use and is based on the type of home you live in, the number of people living there and your landscape square footage. See the Allocation Calculator for more information.

Payment Deadline and Amount Due

Message Area

Check this area for messages and additional information.

Water Use Profile

This information allows you to check your current water use against last year's use. The graph shows your actual water use vs. your water allocation for the past 12 months. Your goal should be to make the dark bars equal to or below the lighter bars each month, which means you are using water within your allocation.
