## **Water pipeline work on the private alley just east of Vicki Lane**

### Background

Irvine Ranch Water District provides water service to the Orange Park Acres community. As a result of the June 2008 annexation, the former Orange Park Acres Mutual Water Company is now the Orange Park Acres Service Area within IRWD. After consolidation, IRWD finalized a Master Plan of improvements for the entire Orange Park Acres water system. Included in the Master Plan is the installation of a new drinking water transmission pipeline.

### Project Description

The next phase of construction involves the new pipeline activation on the alley just east of Vicki Lane. This will be a two part process:

- The first part involves connecting each service to the new system. During this process IRWD will notify residents on a house by house basis and will shut off the water just long enough to move the existing meter to the new location and re-plumb the piping to the private side of the service.
- The second and last part involves removing the old 6" piping from the system and IRWD will place all residents exclusively on the new 8" PVC line. Performing the final tie-in requires a water shutdown, between the hours of 9:00 a.m. and 3:30 P.M., which will affect all six residents on the system.

### Work Hours and Project Schedule

The IRWD approved work hours for this project are 9:00 a.m. to 3:30 p.m. so as to give residents enough time to use the water in the morning prior to the shutdown. This work is planned for December 22, 2011.

### Questions

Questions regarding the project may be directed to Jo Ann Corey or Shannon Reed in the IRWD Public Affairs Department at (949) 453-5500. Project information is updated on the District's website: [www.irwd.com](http://www.irwd.com). We apologize for any inconvenience this project may cause and thank you in advance for your patience.
