RECOMMENDATION:

THAT THE MINUTES OF THE MAY 17, 2022 BOARD MEETING OF THE IRVINE RANCH WATER DISTRICT RETIREMENT BOARD BE APPROVED AS PRESENTED.

LIST OF EXHIBITS:

Exhibit "A" – May 17, 2022 Minutes

Note: This page is intentionally left blank.

## EXHIBIT “A”

### MINUTES OF THE MEETING OF THE BOARD OF DIRECTORS OF THE IRVINE RANCH WATER DISTRICT RETIREMENT BOARD

May 17, 2022

The meeting of the Board of Directors of the Irvine Ranch Water District (IRWD) Retirement Board was called to order by Chairman Swan at 10:30 a.m. on May 17, 2022.

Directors Present: Chairman Peer Swan, Vice Chairman Steve La Mar, and Paul Cook

Also Present: Treasurer Robert Jacobson, Executive Director of Finance and Administrative Services Cheryl Clary, Assistant Treasurer Jennifer Davis, and Dan Quirk of SageView Advisory Group.

COMMUNICATION: None.

ITEMS RECEIVED TOO LATE TO BE AGENDIZED: None.

#### ACTION CALENDAR

#### MINUTES OF BOARD MEETING

Jennifer Davis presented the minutes from the February 1, 2022 meeting.

On MOTION by Cook, seconded by La Mar and affirmed by Peer Swan, the minutes of the February 1, 2022 meeting were approved as presented.

#### Trust Investment Review

---

- A capital markets and legislative update was provided by SageView.
- All trust investment options were reviewed as of 03/31/2022. All options are currently performing in line with benchmarks or above 50th percentile peer group rankings.
- The Portfolio return and expense ratio, style analysis, and asset allocation by fund were reviewed. Of note were the following:
  - As of March 31, 2022, the IRWD Post-Retirement Benefits Trust market value was \$109,290,656, down from \$114,815,352 on December 31, 2021.
  - For the quarter, the net total return was -4.67%, closely tracking with the index-based custom benchmark return of -4.71%.
  - For the trailing twelve months, the total return was 10.85%, closely tracking the custom benchmark return as well.
  - The portfolio is primarily allocated to index funds, leading to a low overall expense ratio of 0.06%.

- The two actively managed funds scored by SageView were in the upper half of peer group rankings, while all index funds received a passing rating.
- The Board adjusted the portfolio’s target allocation as shown in the table below. Trades were executed to achieve this new allocation on May 17, 2022.

Ticker	Fund	05/17/2022 % Target	03/31/2022 % Target
FDRXX	Fidelity Government Cash Reserves	0.0%	0.0%
FUMBX	Fidelity Short Term Treasury Bond Index	9.0%	5.0%
BCOIX	Baird Core Plus Institutional	5.0%	11.0%

RETIREMENT BOARD

IRWD POST-RETIREMENT BENEFITS TRUST  
INVESTMENT REVIEW AS OF JUNE 30, 2022

SUMMARY:

Staff and a representative from IRWD's pension investment advisor SageView Investment Advisors will present the Portfolio Investment Review for the quarter ended June 30, 2022 and provide an update on current market conditions and any recommended portfolio changes.

BACKGROUND:

Quarterly Investment Review:

As of June 30, 2022, the IRWD Post-retirement Benefits Trust market value was \$94,815,395, a net decrease of \$14,475,261 from the prior quarter end. The change was due to a decrease in market value of \$14,997,755 and dividends in the amount of \$537,607. Trust expenses for the quarter included \$15,000 paid to SageView Advisory Group and \$113 for reporting and transaction fees paid to Fidelity. Portfolio changes during the quarter include a reduction of \$6.0 million from the Baird Core Plus Bond Fund, which was transferred to the Fidelity Short-Term Treasury Bond Fund (\$4.0 million) and the Vanguard High-Yield Corporate Fund (\$2.0 million). The fund transfers were directed by the Retirement Board at its May meeting. Assets in the Trust are sufficient to meet IRWD's current CalPERS unfunded liability. The closing balances and fund returns as of June 30, 2022 were as follows:

Investment	Quarterly Return	Month End March 31, 2022	Month End June 30, 2022	Incr/(Decr)	Percent of Portfolio
<b>EQUITIES</b>					
Vanguard Institutional Index Fund.	-16.11%	\$56,287,620	\$47,219,543	(\$9,068,078)	49.8%
Vanguard Extended Mkt (small/mid) Index Fund	-20.67%	8,149,578	6,464,876	(\$1,684,701)	6.8%
Vanguard Developed Market Index	-14.04%	11,060,294	9,507,491	(\$1,552,804)	10.0%
Vanguard Emerging Markets Index	-9.18%	1,569,116	1,425,069	(\$144,047)	1.5%
Vanguard High Dividend Yield Index Admiral	-8.65%	10,624,408	9,705,255	(\$919,153)	10.2%
<b>FIXED INCOME</b>					
Baird Core Plus Bond Fund	-5.22%	11,802,286	5,177,423	(\$6,624,863)	5.5%
Vanguard High-Yield Corporate Fund	-8.62%	4,385,961	5,945,594	\$1,559,633	6.3%
Fidelity Short Term Treasury Bond	-0.87%	5,369,224	9,332,911	\$3,963,687	9.8%
<b>CASH-SHORT TERM</b>					
Fidelity Government Cash Reserves		42,168	37,232	(\$4,936)	0.0%
Closing Balance		\$109,290,656	\$94,815,395	(\$14,475,261)	100.0%

For the quarter ended June 30, 2022, the portfolio return was -13.23%, compared to the index-based custom benchmark return of -13.73%. For the one-year period ended June 30, 2022, the return was -12.13%, compare to the index-based custom benchmark return of -12.79%. The Portfolio Investment Review as of June 30, 2022 is provided as Exhibit "A".

A representative from SageView will present the Portfolio Investment Review for the quarter ended June 30, 2022, update the Board on current market conditions, and provide any recommended portfolio changes for the Board's consideration.

FISCAL IMPACTS:

Fiscal impacts are as described above.

ENVIRONMENTAL COMPLIANCE:

This item is not a project as defined in the California Environmental Quality Act Code of Regulations, Title 14, Chapter 3, Section 15378.

RECOMMENDATION:

Based on discussions and direction from the Board, staff will implement changes to the investment portfolio, if any.

# Q2 2022 BY THE NUMBERS

## Bear Market

With the index down more than 20%, the S&P 500 is officially in a bear market. The first half of 2022 represents the index's worst first six months since 1970. Rising interest rates and muted growth prospects triggered further contraction in multiples, extending the selloff from the first quarter. The Information Technology and Consumer Discretionary sectors suffered particularly painful losses. However, corporate earnings expectations remain positive for the second quarter.

## Fed in a Corner

In June, the Federal Reserve raised interest rates by 75 basis points, the largest increase since 1994. Fed Chair Jerome Powell said the risk of failing to maintain price stability was of greater concern than the risk of rate increases pushing the economy into recession. Futures markets project the federal funds rate to finish 2022 around 3.75%. Meanwhile, the Atlanta Fed's GDPNow forecasting model suggests a second quarter economic contraction of 1%.

Growth Rate

## Leading Indicators

The University of Michigan Consumer Sentiment Survey registered its lowest historical reading in June. However, unemployment remains low and job markets are tight. Business and residential investments remain above historical levels. Even with supply chain bottlenecks, light vehicles sales are close to historical averages. Though recession concerns are elevated, the prospects for a prolonged recession are small. Historically, economic expansions last longer than contractions.

# EQUITIES

June 30 capped the worst first half of a year since 1970 as the S&P 500 officially entered a bear market. Rising rates, inflationary pressures, and geopolitical concerns soured capital markets. All eleven equity sectors finished the quarter down. Recessionary expectations increased as the Fed has prioritized raising rates to achieve price stability.

# FIXED INCOME

Late in the quarter, the Fed shifted to more aggressive rate increases as inflationary data accelerated. Concurrently, the yield curve flattened, signaling increased odds of a recession. Credit spreads widened amid muted growth prospects and inflationary pressures. Despite recessionary signals, corporate credit fundamentals (EBITDA, Free Cash Flow, Interest Coverage Ratios) remain strong.

# Investment Discussion Summary - Current Investments

Fund Name % of Plan Assets Category	Comment Date	Comments
Baird Core Plus Bond Inst 5.46 Intermediate Core-Plus Bond	06/30/2022	<p>Performance Update (6/30/2022): The fund modestly underperformed the Bloomberg U.S. Universal Bond Index in Q2. Credit positioning was negative overall with an overweight position to investment grade credit as spreads widened. Active positioning within Investment Grade Credit was also a headwind, specifically an overweight to BBB credit and financials that did not keep pace with other fixed income securities. Some of this was offset by a relative underweight to high yield emerging market and high yield U.S. Corporate debt which performed poorly over the period. Yield Curve positing in the rate rising environment did not impact returns. Over the trailing 1 year, the fund underperformed the benchmark. The overweight position and security selection within Investment Grade Credit and yield curve positioning were the primary detractors over the trailing 12 months.</p> <p>Strategy Summary: The fund utilizes a duration neutral approach relative to the benchmark. Typically, portfolio managers hope to generate the most excess return (about 40% of alpha) through security selection, then sector allocation (30% of alpha), yield curve positioning (25% of alpha), and lastly trade execution (5% of alpha). Credit analysts first determine which issuers appear to offer the best value within each sector. Only US dollar denominated securities are utilized in this fund with no use of derivative securities. The prospectus benchmark for the strategy is the Bloomberg US Universal Index. The standard category benchmark is the Bloomberg US Aggregate Bond Index. Fund comments are relative to the prospectus benchmark.</p>
Vanguard High-Yield Corporate Adm 6.27 High Yield Bond	06/30/2022	<p>Performance Update (6/30/2022): The Vanguard High Yield fund delivered strong results relative to both peers and the benchmark in the second quarter. Strong security selection within the Information Technology, Pharmaceutical, and Gaming sectors and subsectors drove results. Additionally, the portfolio manager's preference for higher credit quality bonds relative to peers was accretive during the broad market selloff. Additionally, the fund's smaller positioning within Treasuries (held for liquidity purposes) boosted results. For the trailing one-year, the strategy outperformed the benchmark. The fund maintains an average credit rating of BB- versus the rating of B for the category average.</p> <p>Strategy Summary: The Fund invests primarily in a diversified group of high yielding, higher risk corporate bonds with medium and lower range credit quality ratings. The Fund invests at least 80% of its assets in corporate bonds that are rated below Baa by Moody's. The Fund may not invest more than 20% of its assets in any of the following, in the aggregate: bonds with credit ratings lower than B or the equivalent, convertible securities, preferred stocks, and fixed and floating rate loans of medium to lower range credit quality. The standard category benchmark is the BB Barclays US Corporate High Yield Bond Index. Fund comments are relative to the prospectus benchmark.</p>

# ACTIVE INVESTMENT OPTIONS ANALYSIS CRITERIA

All active plan investment options are reviewed quarterly against their peer group and index benchmark to determine the performance and quality of each offering. Each are evaluated using the following criteria:

1. Trailing 1, 3, 5 and 10 year returns – Total return is a basic measure of a fund’s performance. Fund returns over each period are factored into a weighted average, based on the life of a fund. Recent returns receive a slightly higher weighting, while older returns, which may have been produced under different conditions, are weighted less.
2. Rolling period returns – A rolling period return divides a longer time frame into smaller time periods. A rolling 12-month return over five years is computed by first calculating a single period return over the first twelve months. Next, it calculates the 12-month return for months 2-13. The process continues until finally reaching the 12-month period spanning months 48-60. The final rolling figure reflects the average of all of the 12-month returns.
3. Batting Average – Batting average is calculated by (1) tallying the number of months in a given observation window where the investment return is greater than the return of the peer group median return and (2) dividing this amount by the total number of months in the observation window. The result is a ratio that ranges between 0 and 1. A batting average of greater than 0.50 signifies that the investment has outperformed the peer group more frequently than it has underperformed, irrespective of the magnitude of any outperformance or underperformance.
4. Style Consistency to the appropriate index – We utilize R-squared to assess whether the funds selected for the plan continue to operate and perform as expected within their appropriate asset class. R-squared measures the closeness between a fund's returns and movements in the benchmark. All active funds have some deviation from their benchmark, but excessive deviation could indicate that a fund is drifting away from its stated category mandate.
5. Modified Sharpe Ratio – The standard Sharpe Ratio calculation is calculated by subtracting the risk-free rate of return (the US Treasury Bill is typically used) from the portfolio return and dividing the result by the portfolio’s standard deviation. A higher Sharpe ratio indicates that the portfolio was able to generate a higher return per unit of risk. Modified Sharpe Ratio is a related statistic that is equal to the Sharpe Ratio under normal circumstances. However, the Modified Sharpe calculation adds an exponent to the denominator that effectively raises the denominator to the -1 power in circumstances in which an investment’s excess return is negative. This modification ensures that investments with both negative excess returns and higher standard deviations rank lower than investment with negative excess returns and lower standard deviations. Under the standard Sharpe Ratio calculation, the opposite is true.
6. Alpha – The use of Alpha allows us to gauge the effectiveness of the manager. Alpha is the difference between the portfolio's actual return and its expected return given the funds level of risk as calculated by beta.
7. Up Capture Ratio – The up capture ratio calculates the percentage of return of an index that a fund has captured during up market cycles. It tracks the fund's relative performance versus the appropriate index when the index is going up.
8. Down Capture Ratio – The down capture ratio calculates the percentage of return of an index a fund has captured during down market cycles. Funds that perform well in this category tend to reduce the downside loss for investors during bear markets.
9. Expense Ratio – The expense ratio is compared to the appropriate category average expense and then given a score based upon that percentage. This rewards low-cost funds and penalizes high-cost funds. Expense ratios are effectively "double weighted" in our scoring methodology, because performance returns are already net of expenses. Since fiduciaries are encouraged to carefully manage expenses, we believe explicitly factoring in fund fees is prudent.

Each fund is benchmarked to a specific market index, and fund performance is evaluated and compared to a relevant peer group using Morningstar category classifications. A fund is given a peer group ranking for each criterion, shown as a percentage. The percentage rankings for all criteria are then averaged to give a fund its average ranking score. All funds with at least a three year track record are scored in the above manner. A fund is then classified as Top Decile, top Quartile, 2nd Quartile, 3rd Quartile or 4<sup>th</sup> Quartile based upon the overall score compared to all other funds within that particular asset category.

# PASSIVE INVESTMENT OPTIONS ANALYSIS CRITERIA

All passive investment options are reviewed quarterly against their peer group and index benchmark to determine the performance and quality of each offering. Each are evaluated using the following criteria:

1. Expense Ratio – The percentage of fund assets, net of reimbursements, used to pay for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund, except brokerage costs. Fund expenses are reflected in the fund's NAV. Sales charges are not included in the expense ratio. The Prospectus Net Expense Ratio is collected annually from a fund's prospectus.
2. Tracking Error – A measure of the difference in returns between an investment and a benchmark. Tracking error is reported as a standard deviation of the difference between the returns of an investment and its benchmark.
3. R-Squared – A statistical metric that ranges from zero to 100 and measures the percentage of portfolio's performance that is explained by the movement of its benchmark index. R-Squared is helpful in assessing the reliability of alpha and beta in explaining a portfolio risk and return characteristics. An r-squared of 100 would mean that the portfolio's performance movements are perfectly correlated with those of the benchmark over time, and would suggest that alpha and beta may be relied upon with a high degree of confidence.
4. Beta – A measure of the volatility, or systematic risk, of an investment in comparison to a market index as a whole. Beta is calculated using regression analysis. Beta represents the tendency of an investment's returns to respond to moves in the market or index that it's calculated against. A beta of 1 indicates that the investment's price moves with the market. A beta of less than 1 means that the investment is theoretically less volatile than the market. A beta of greater than 1 indicates that the investment's price is theoretically more volatile than the market. The reliability of an investment's beta is a function of the investment's r-squared value in relation to the benchmark. A high r-squared value signifies that the beta measure is reliable, while a low r-squared signifies that it is potentially inaccurate.

Each of the criteria above carries a proprietary weight. An index fund is evaluated and ranked in each of the above criteria relative to their peer group. A fund is given a peer group ranking for each criterion. The percentage rankings for all criteria are then weighted to give a fund its average ranking score.

The raw score is then normalized on a scale of 1 to 100, with 1 being the best and 100 the worst. The top 75% of the funds in a category receive a passing score, while the bottom 25% fail.
