

NTS Fact Sheet 2015-2016

General Information

	Total Site Area	Drainage Area	Portion of 76,000 acre Watershed	Inflow	Outflow
NTS Sites (27)	180.3 acres	15,275.2 acres	20%	346,600,000 gallons	278,200,000 gallons
San Joaquin Marsh	429 acres	63,536.4 acres	84%	879,200,000 gallons	476,800,000 gallons

Pollutant Removal

Pollutant		Total Load Reduction		Removal Efficiency	
		NTS Sites	San Joaquin Marsh	NTS Sites	San Joaquin Marsh
Nitrogen (TN)		7,475 lbs	33,000 lbs	67%	85%
Selenium (Se)		5.3 lbs	140	60%	79%
Orthophosphate (PO ⁴)		351.4 lbs	80.04	74%	100%
Copper (Cu)		8.3 lbs	36.4	71%	59%
Total Coliform		-	-	73%	99%
Trash		14,055 lbs	4,929 lbs	90%	75%
Sediment		3 tons	47.1 tons	50%	20%

San Joaquin Marsh

The San Joaquin Marsh, the first and largest of IRWD's Natural Treatment Systems (NTS) was established in 1997. The Marsh has a water residence time of approximately 21 days, and receives urban runoff from 84% of the San Diego Creek/Newport Bay Watershed.

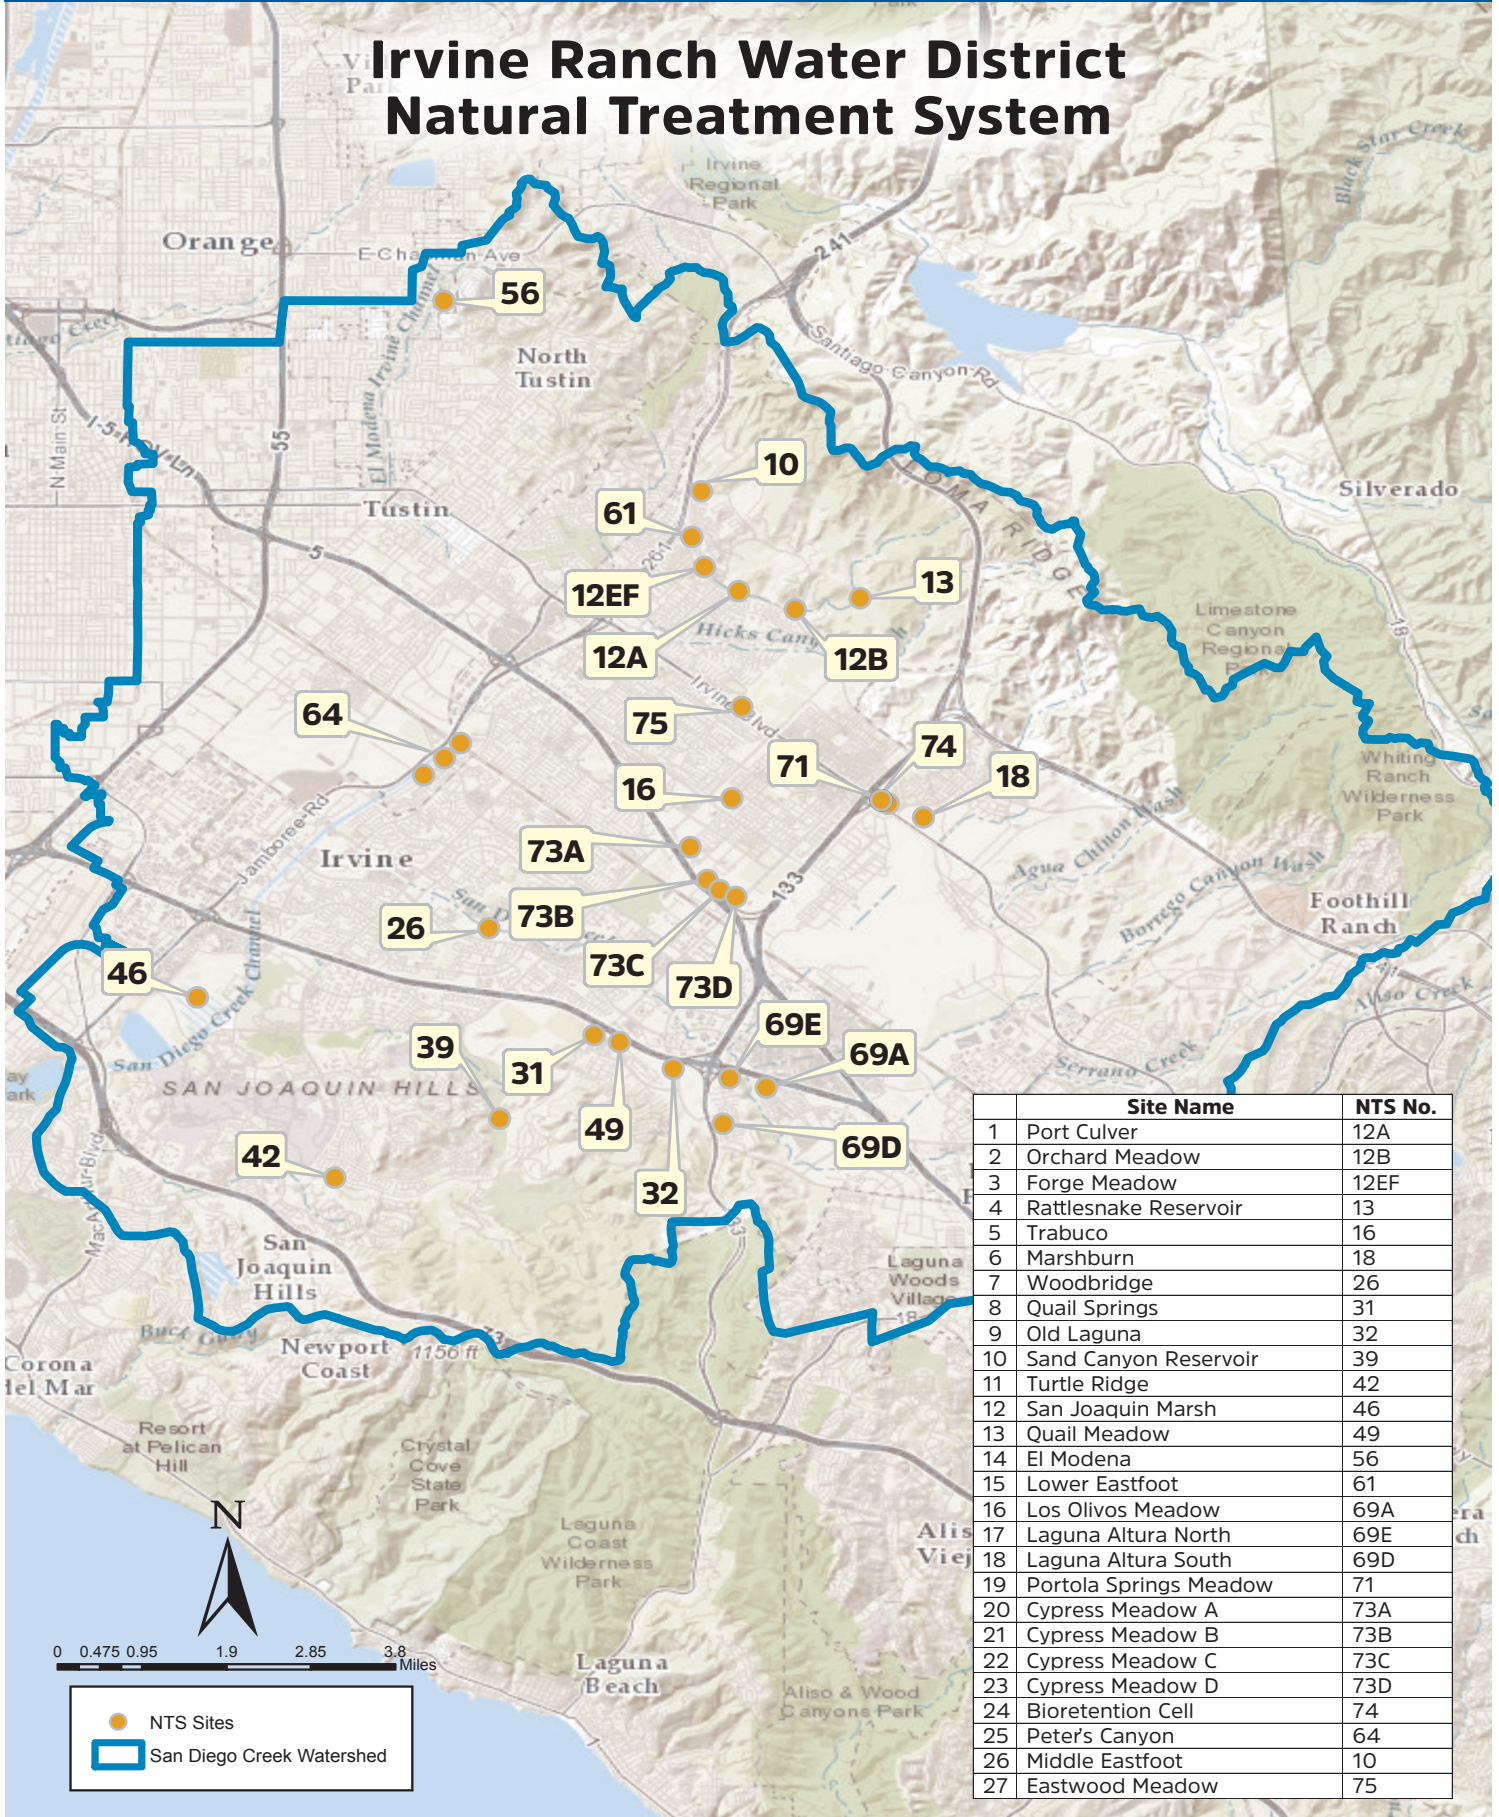

Marsh Facts

- 429 acres
- Treats on average over 1 billion gallons of water annually
- 12.3 miles of nature trails
- 121 plant species
- 282 birds species
- 7,500 people participated in dozens of educational programs carried out by 108 naturalists volunteering over 8,500 hours

Irvine Ranch Water District Natural Treatment System

	Site Name	NTS No.
1	Port Culver	12A
2	Orchard Meadow	12B
3	Forge Meadow	12EF
4	Rattlesnake Reservoir	13
5	Trabuco	16
6	Marshburn	18
7	Woodbridge	26
