Tips to shrink your water footprint

Water supports every aspect of life. Do you know how much you really use?

Just like a carbon footprint measures an individual's direct and indirect impact on climate change, your water footprint reflects the total amount of water used to help you through your day. It factors in what you use at home and the water used to produce the food, goods, and services you consume.

Reducing your water footprint is a cost-effective way to extend water resources while promoting sustainability. Here are some easy ways to get started.

- **Avoid daylight and wind when you water** to reduce waste from evaporation.
- **Adjust sprinklers** so they're not spraying the sidewalk or driveway and turn them off when it rains.
- **Visit watercalculator.org** to measure your water footprint.

For water-saving tips and more, visit IRWD.com/drought.

Meeting rooms open for reservations!

IRWD is accepting 2023 applications to reserve the Duck Club and Community Meeting Room—two facilities available free to residents and nonprofit organizations in our service area.

The Community Meeting Room near our Sand Canyon headquarters is available for meetings and club organizations. The Duck Club at the San Joaquin Marsh Campus can be reserved for meetings and private events.

For more information, and to submit your application please visit IRWD.com/MeetingRooms.

Live events are in full swing for 2023

IRWD is ramping up in-person activities with a calendar full of workshops, community tours and special engagements in the coming year. Hosting face-to-face experiences, workshops and events is a valuable way for YOU, our customers and community, to interact directly with IRWD staff and partners. It's also an opportunity for you to learn, get access to resources and obtain insight on important topics such as water efficiency, landscaping and resilience.

IRWD's events have been mostly online since 2020. But after two years of pandemic-related separation, recommended best practices are being followed for safe in-person gatherings.

Receive emails about upcoming events by signing up for our gardening newsletter, *The Dirt*, at [IRWD.com/TheDirt](https://www.irwd.com/TheDirt), or check our calendar and reserve your spot at [IRWD.com/events](https://www.irwd.com/events).

Ask Juan

Q: Juan, we are thinking of replacing our front lawn and are considering using Dwarf Carpet of Stars. What do you recommend?

A: Hello! I've seen a few yards planted with Dwarf Carpet of Stars and like the look and feel of it. It does make an excellent ground cover. I would also recommend kurapia. It spreads quickly and thrives with watering only once a week during summer. There are other lawn alternatives such as dymondia,

creeping thyme, white clover, and yarrow. Take time to review these and use what is best for your needs. For further help, please refer to IRWD's [RightScapeResources.com](https://www.irwd.com/RightScapeResources.com) website for other selections and ideas.

Got landscape questions? Email AskJuan@IRWD.com or ask on Facebook, Twitter or Instagram with [#irwdcommunity](https://www.facebook.com/irwdcommunity). See past answers at [RightScape.com/landscape-resources/ask-juan](https://www.irwd.com/RightScape.com/landscape-resources/ask-juan).

California native corner

Juan's January plant: golden yarrow

Golden yarrow (*Eriophyllum confertiflorum*) is a flowering perennial that grows in clumps, topped with clusters of bright golden blossoms. It blooms in winter, spring and summer and makes an excellent lawn alternative. It is very drought tolerant and is the perfect pollinator plant for any garden, attracting butterflies, bees, and caterpillars. Learn more at [CalScape.org](https://www.CalScape.org) and [CalScape.org/planting-guide.php](https://www.CalScape.org/planting-guide.php). — Juan

Ask Customer Service

Q: Why does my bill fluctuate from month to month?

A: IRWD's budget-based rate structure encourages customers to use water wisely. Based on the number of people in the home, the square footage of outdoor landscaping, and the weather, your monthly budget is lower in the fall and winter, and higher in summer to adjust to the seasonal water needs of plants.

Customers who stay within their water budget enjoy some of the lowest water bills in Orange County. Those who exceed their budget pay a higher rate to cover the costs of the more expensive water sources and water efficiency programs needed to serve them.

Your bill also includes fixed water and sewer charges to cover operating and maintenance costs, and infrastructure replacement costs to provide those services. Fixed charges are based on a 30-day billing cycle so your bill may vary slightly depending on the number of days in your cycle. Visit [IRWD.com/rates-charges](https://www.irwd.com/rates-charges) for more information.

Got a question? Email info@IRWD.com with "Ask Customer Service" as the subject line.
