## 1.3 Commodity Charges

- 1) Rates are based on usage per hundred cubic feet (ccf).
- 2) Irvine Ranch Water District (IRWD) establishes a water budget for each customer. The rates billed are based on use as a percentage of budget. Water budgets are based using an assumed number of residents (and units, in the case of apartments), landscape square footage and actual daily weather and evapotranspiration (ET) data for each of three microclimates within the District.
- 3) Customers may apply for water budget variances for larger than normal landscaped areas, more people living in the home or special medical needs.
- 4) The water budget process is described in detail in Budgets and Variances on page 10 and residential customers can apply for a variance at <https://www.irwd.com/services/request-a-water-variance>.

## 1.4 Water Budgets and Variances

### 1.4.1 Base Water Budgets For Commodity Charges

Monthly budget includes a fixed component for indoor usage and a variable component based on evapotranspiration (ET) rate for landscape irrigation.

Account Type	Base Budget Number of Residents	Landscape Area (LA)	Base Budget Indoor	Base Budget Outdoor ET x LA x PF	Total Budget
Residential Detached	4	1300 sq. ft (0.03 acres)	# Residents x 50 gpd (IU)	ET x LA x 0.75	(Indoor x # days in bill service period) + Outdoor
Residential Condo Attached/ Detached*	3	435 sq. ft (0.01 acres)	# Residents x 50 gpd (IU)	ET x LA x 0.75	(Indoor x # days in bill service period) + Outdoor
Apartments*	2	N/A	# Residents x 50 gpd (IU)		Indoor x # days in bill service period
Potable Irrigation		Site specific based on irrigated acreage	N/A	ET x LA x 0.75	Outdoor based on bill service period
Recycled Irrigation		Site specific based on irrigated acreage	N/A	ET x LA x 0.87	Outdoor based on bill service period
Commercial, Industrial, Public Authority, and mixed non-residential Use			Site specific, based on productivity, employees, water use efficiency practices etc.	Site specific, based on irrigation needs	Site specific, adjusted for # days in bill service period

\*For master-metered apartments and condominiums, the base budget is multiplied by the number of dwelling units.

**CCF** = 100 cubic feet. 1 CCF = 1 billing unit = 748 gallons

**ET** = reference evapotranspiration – from IRWD weather stations located in coastal, central or foothill zones for cool season turf

**GPD** = gallons per day

**IU** = Internal Use – assumes 50 GPD per person

**LA** = irrigated landscape acres

**PF** = plant factor. Adjusts ET based on plant needs relative to cool season turf and irrigation system efficiency requirements. The plant factor for potable irrigation is 0.75. For recycled water, the plant factor is 0.8

## 1.4.2 Water Budget Variances

Variances are available for larger than normal landscaped areas, more people living in the home or special medical needs. Applications for variances may be obtained from the District website <https://www.irwd.com/services/request-a-water-variance> or from Customer Service at (949) 453-5300. See IRWD Rules and Regulations, Section 12.6 for variance procedures.

### 1.4.2.1 Justifications for variances

Applicants must provide proof acceptable to the District to support any variance request.

- 1) Number of people residing in a residential dwelling unit  
Each additional person increases the budget by 1.6 ccf/month which is IU x 0.8.
- 2) Landscape  
Increased budgets shall be given for residential lot size beyond the standard base budget lot size. Applicants must provide acceptable documentation to the District of the actual irrigated landscape area served.
- 3) Medical needs  
Approval is contingent upon medical documentation.
- 4) Increased budget will be determined on a case-by-case basis and based on the type of medical need.
- 5) Licensed care facilities (in a residential dwelling unit)  
A current license from appropriate regulatory agency will be required.
  - a. A licensed 24-hour care facility will be provided budget increases based on the IU x 0.8 for each additional resident.
  - b. A licensed day care facility (not 24-hour) will be provided budget increases based on the IU x 0.5 for each additional person.
- 6) Additional budget for medical reasons will be determined on a case-by-case basis.
- 7) Fire control zones  
Adjustments to budgets will be determined by the District based upon relevant factors such as area, slope, planting material, etc.
- 8) Commercial/industrial/public authority  
Adjustments to the base budget will be determined on a case-by-case basis. Relevant factors will include expansion of productive capacity, existing conservation practices that can be shown to have reduced water usage, severe economic hardship, etc.
- 9) New account establishment variance  
Landscape accounts – billed at the base rate for the first six months and, beginning in the seventh month, the budget will be based on irrigated acres.
- 10) Commercial and industrial accounts – billed at the base rate on usage for the first six months and, beginning in the seventh month, the monthly budget will be based on unique business and site demands as determined by the District.

### 1.4.2.2 Variance limitations

- 1) An approved variance will become effective on the date the request for variance is approved by the District but must be submitted within thirty (30) days of receipt of the bill.
- 2) Approvals are valid for a period specified by the District (one year or less) and must be resubmitted on or before the expiration date to remain in effect.

### 1.4.2.3 Water budget variance impact

- 1) Residential  
Approved variances will extend each tier of the residential structure by a percentage.
- 2) Non-residential  
Approved variances will extend each tier of the non-residential structure by a given percentage (or other method) determined on a case-by-case basis.

## 1.5 Pumping Surcharges

- 1) A pumping surcharge will be added to the variable water usage charge for customers in locations that cause the District to incur additional pumping costs to supply their water. Customers are assigned to an area depending upon the average cost to pump water to serve their location.
- 2) The surcharge is based upon prevailing energy costs.

Backflow Testing Fee - \$100

## 1.9 Water Shortage Contingency Plan (WSCP) Rates

The IRWD Board of Directors adopted an updated Water Shortage Contingency Plan (WSCP) in June 2021. The WSCP includes a “toolbox” of potential strategies for responding to 6 levels of water shortage.

Using WSCP as a guide and following Proposition 218’s requirements, rates were developed for each shortage level. These will be referred to as “WSCP rates” and have only been developed for the potable system commodity rates. They have no impact on the monthly fixed service water or sewer charges or on the recycled system.

The rates at each level are as follows.

<i><b>Tiers</b></i>	<i><b>WSCP Levels Commodity Rates</b></i>					
	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>
	Up to 10%	11-20%	21-30%	31-40%	41-50%	Over 51%
Low Volume	\$2.08	\$2.09	\$2.10	\$2.11	\$2.14	\$2.17
Base	\$2.78	\$2.87	\$2.93	\$3.05	\$3.26	\$3.50
Inefficient	\$7.49	\$7.61	\$7.67	\$7.46	\$7.88	\$8.82
Wasteful	\$19.42	\$20.25	\$21.20	\$22.53	\$24.96	\$28.36

These commodity rates provide cost of service equity for the budgeted Board-approved operating variable costs and additional costs incurred as a direct result of a water shortage declaration at the associated stage level. Implementation of WSCP rates would require additional Board action.

## Section 2: Sewer

### 2.1 Monthly Sewer Service Charge

#### 2.1.1 Residential (Single Family And Multi-Family Dwelling Units)

- 1) No credit will be granted for vacancies resulting from the normal turnover of occupants in an existing multiple dwelling unit. The price structure contained herein includes considerations of average vacancy rates.
- 2) A newly constructed multiple dwelling unit may be billed at the non-residential metered rate, with appropriate allowance for landscape irrigation, until the structure is released for occupancy.

##### 2.1.1.1 Collection and treatment

- 1) The monthly sewage service charge is based upon the average of the actual lowest three months' water usage during the prior calendar year. Charges are based on a 30-day billing period.

- 2) Due to landscape irrigation or consumptive usage, some non-residential users may discharge substantially less of their metered water into the sewer system. Those users may, upon request to the District, be permitted to have the amount of water being discharged into the sewer determined by means acceptable to the District.
- 3) To qualify for the sewage service charge only, a customer usage history cannot be greater than 120 ccf in a full calendar year based on actual meter readings. Usage exceeding 10.0 ccf per month will pay a quantity charge.
- 4) Upon request by the user and at the sole discretion of the District, an alternate service charge may be applied.
- 5) During construction, prior to occupancy, these rates are applicable.
